

AUDIOVISUAL, LIGHTING & RIGGING EQUIPMENT SALES & INSTALLATION SERVICES

YOU ARE OUR PRIORITY

Our first priority is meeting the needs of our partners and clients. We strive to complete projects on time, on budget, and with minimal interruption. We offer flexible scheduling, complimentary site surveys, and expert technical advice.

Upon project completion, our team offers continued support for each installation. Clearwing is more than your vendor; we are your on-going partner and are committed to the long-term success of your installation.

NATIONWIDE INSTALLATION

Clearwing installs products from over 250 different audiovisual, lighting, and rigging manufacturers nationwide into individually unique environments, customizing each installation to each Equalis Group member's needs.

AVAILABILITY

Clearwing remains readily available with technical staff who maintain a 24-hour phone number, have loaner equipment on hand, and boast quick response times.

COMMUNITY OUTREACH

Clearwing hosts regular free vendor showcases and technical training seminars to foster education in the community. The company also supports organizations such as local chapters of USITT and the High School Thespian Societies.

CERTIFICATIONS & TRAINING

Clearwing's staff has a wide range of experience in Sales, Design, Integration, Inspections, Commissioning, Training, Service, and Repairs. We are intimately familiar with the inner workings of all types of facilities including stadiums, arenas, casinos, hotels, schools, theatres, houses of worship, and more.

Clearwing consistently sends staff members to advanced training and certification courses in order to maintain our edge on emerging technologies. Professional memberships are encouraged, and staff members are routinely educated on developing standards and practices.

RECENT PROJECTS

PERFORMING ARTS

Current performance technology benefits more than just the performance.

K-12 and places of higher education need quality performance systems for concerts, musicals, and theatrical events. Those systems also must be safe and working in a way that promote students' discovery and exploration of the arts. Multi-purpose rooms and auditoriums equipped with proper systems allow students to gain invaluable hands-on experience with performance technology.

RECENT PROJECTS

ATHLETICS

State-of-the-art audiovisual installations captivate fans with everything they see, hear, and touch, creating the one-of-a-kind experiences that a fan will embrace and remember.

Announcements need to be heard. Advertisements and video need to be seen. The crowd and teams need to be excited within the environment. Clearwing Systems Integration can take that experience to the next level.

OTHER FACILITIES

Classrooms, lobbys, arenas, roadhouses, and event centers also need systems that are eye-catching and reliable. These spaces may be classrooms where students learn day in and day out, or the first place a prospective student observes as they make their decision on their future learning institution. Facilities need to feature operational systems that keep up with today's technology to develop tomorrow's experienced, and ready-to-be-hired students.
