

1 The Problem

Education facilities and classrooms require special attention during unplanned shutdowns to help prepare for returning staff and students. Institutions of primary and higher education, working together with local health departments, have an important role in slowing the spread of diseases, and protecting vulnerable students, staff and faculty to help ensure a safe and healthy learning environment.

2 Solutions that Work

During unplanned shutdowns, the cleaning staff should disinfect all areas, especially frequently touched surfaces. Shutdown periods are also a great time for facilities to tackle the ever-growing demand of deferred maintenance and to work on much-needed projects such as painting, HVAC filter changeouts and energy-saving projects like lighting retrofits. In addition, shutdown and recovery periods are a perfect time to evaluate your safety and emergency planning programs.

3 How Grainger Can Help

From K-12 to higher education, count on Grainger for solutions to help keep your students and staff safe. We also have the maintenance supplies you need to keep your facilities running smoothly.

Products

- Cleaning & Sanitation
- Lighting
- Test Equipment
- Material Handling
- Tools
- HVAC & Filtration
- Safety & Security

Services & Solutions

- Pandemic Response/Personal Protective Equipment Training
- Business Continuity Planning
- Regulatory Compliance Audits
- Firestop: Barrier, Door & Damper Inspection

Expertise

- Field Safety Specialists
- Metalworking Specialists
- Dedicated Government Account Management

Fast Facts

From 2011 through 2015, U.S. fire departments responded to an **estimated average of 4,100 structure fires in dorms, fraternities, sororities and other student residences**, causing \$14 million in direct property damage costs.¹

In the next three years,

47% of higher education facilities expect increased construction activity on their campuses.²

One way to help keep the air in your school building safe is to increase ventilation by opening windows or adjusting air conditioning.³
