World Class Customer Service

DIRECT ACCESS TO OUR PARTS DEPARTMENT

Our Global Customer Service is handled directly through our USA Headquarters in Sarasota, FL.

Our on-site Warehouse Parts Department stocks an inventory of over \$250,000 of unique parts so that our customers never have to wait for part replacements. Most ship out within 24 hours of order processing.

5-Year full coverage warranty available.

BUILT ON THE STRONGEST POSSIBLE FOUNDATION

- Every Cruise Car is built on a Rust and Maintenance-Free Aluminum Frame.
- Our unique, thick-density aluminum is 25% thicker than our competitors' frames and reinforces each vehicle so that it can safely carry the weight of multiple passengers without bending or breaking.
- We offer 5 different chassis lengths that are pre-sized for the length of each cart.

THEIRS

- Steel (prone to rust and corrosion)
- 3mm chassis walls
- Weak stretched and welded frames
- Untempered

OURS

- Extra-Thick Aluminum (rust and maintenance-free)
- 4mm chassis walls
- Custom-made chassis lengths
- Tempered

Superior Front Suspension

THEIRS

No Shock-Tower Support — unreliable suspension for carrying multiple passengers.

Single Leaf Spring Support is not sufficient for heavy passenger vehicles.

OURS

Reinforced Shock-Tower engineered to provide maximum support for vehicles with a heavy load.

Coil over springs allow customers to adjust the strength and smoothness of front suspension system.

Triple Leaf Spring is 3x stronger than the next leading competitor.

NEARLY DOUBLE THE POWER OF THE LEADING COMPETITOR

Every Cruise Car is equipped with a premium 7 Horsepower, 4.5Kw AC Motor. This powerful motor provides greater speed, acceleration and torque to conquer hills and carry up to 8 passengers with ease.

THEIRS

- 3.3 Horsepower
- 2.4 KW
- Limited Programming

OURS

- 7.0 Horsepower
- 4.5 KW
- Fully Programmable

NEARLY DOUBLE THE POWER OF THE LEADING COMPETITOR

Our high-powered controllers allow customers to swiftly change speed, torque, acceleration, braking and more. Cruise Car's multi-vertical plate design is specially engineered for airflow and to dissipate heat.

THEIRS

- 250 Amp IQ Controller
- Limited Programming
- Flat base is prone to overheating and is expensive to replace

OURS

- 300 Amp Controller
- Comprehensive Custom Programming Available
- Accepts 48v & 72v Power Systems

ADVANCED WIRELESS CONNECTIVITY

- Most reliable charger in the industry
- 3-Year Warranty with Global Support Team
- Monitor the condition of your batteries and manage your fleet right on your [iOS](#)[™] or [Android](#)[™] mobile devices

DVL CHARGER APP CAPABILITIES

- Current state of charge for a single unit or your entire fleet
- Early charge termination details with date and time stamps
- PCS tech support call button
- Upload historical data to email button
- Tutorials, videos, definitions, FAQs and more
