GET BACK TO BUSINESS SAFELY

MADE IN NORTH AMERICA

Antimicrobial Recycling

from the Spectrum® Series

Introducing a new, solid antimicrobial copper alloy solution that kills greater than 99.9% of bacteria within two hours, and continues to kill more than 99.9% of bacteria even after repeated contamination.

Bacteria can double every 20 minutes on unprotected surfaces, but Busch Systems recycling & waste stations with all-new Element™ Lids (made with CuVerro Shield™ protection by Aereus Technologies) work to continuously fight off microbes and protect the hardware, your patrons and your staff!

Efficient Servicing for Safe Spaces

from the Aristrata® Series and the Waste Watchers® Series

Design increases the usability and the durability of an excellent recycling & waste station. Simple changes in design can have huge impacts in the receptacles' ability to stand up to the rigors of collection and usage during reopening. Busch Systems containers are expertly designed to handle the harshest collection and usage while maintaining quick and simple serviceability for your staff.

Choose from a variety of stocked colors, openings, signage options, and accessories to help you communicate stream differentiation and achieve your program goals.

Talk to our experts today about how we can help you find the right recycling & waste container for safely reopening your space!
