Water Damage Restoration for a Federal Building

Laguna Niguel, CA

Laguna Niguel, CA

Water Damage Restoration

When a water main broke on the second floor of an iconic federal building in Laguna Niguel, California, ATI was called into action.

The distinctive pyramid-shaped building houses a number of government agencies, and visitors are required to pass through electronic security equipment on the first floor. Security was tight as ATI addressed asbestos issues and dried documents, among other tasks.

Most of the work was completed from 7 p.m. to 7 a.m. to avoid disrupting the offices. ATI crews set up containments every night to minimize dust, moved furniture to access work areas and restored offices to the way they found them each morning. ATI utilized an empty ballroom to install drying chambers for specialized, privileged and confidential documents.

With 100 workers per shift seven days a week for an entire month, ATI completed a sensitive project that many competitors were unable to bid on because of the multiple specialty trades required.

About American Technologies, Inc.

Established in 1989 by Gary Moore, American Technologies, Inc., is the nation's largest family-owned and operated restoration contractor. Headquartered in Anaheim, Calif., the company specializes in restoration, environmental and reconstruction services following natural and man-made disasters with an unwavering commitment to customer service.
