# COLORPLUS™ SYSTEM

## 100% Acrylic, Sport Surfacing System

**A 100% acrylic, sport surfacing system for tennis, basketball, and multipurpose court surfaces. Ideal for application on asphalt, concrete, and existing acrylic surfaces.**

### USES:

- Tennis Courts, Pickleball, and other Racquet Sports
- Basketball Courts
- Playgrounds and Game Courts
- Asphalt or Concrete Recreational Areas
- Multipurpose Courts

The SportMaster ColorPlus System is a series of specialized products, used for sport surfacing and repair.

### ACRYLIC CRACK FILLERS

**Acrylic Crack Patch, CourtFlex™, Clear Crack Sealant and CrackMagic™** - Used prior to resurfacing, or for crack repair on existing acrylic surfaces. Available in neutral, red & green colors. Acrylic Crack Patch is also available in blue.

### PATCHING / LOW SPOT REPAIR

**Acrylic Patch Binder** - Mix onsite with portland cement & sand to produce a compound for filling low spots & cracks on sport surfaces.

### FILLER / TEXTURE COATS

**Acrylic Resurfacer** - Used to fill surface voids and provide texture to the pavement surface prior to application of the ColorPlus Color Coating System. Available in black or neutral.

### COLOR SURFACING COATS

**ColorPlus Color System** - ColorPlus Pigment Dispersion is added to Neutral Concentrate to achieve a fully-pigmented surface coating that is mixed with sand and water. Neutral Concentrate with sand is also available, in case the proper sand is not available locally and factory-mixed sand is preferred. The ColorPlus Color System is applied in a minimum of 2 coats on top of Acrylic Resurfacer.

### STRIPING

**Stripe Rite™ Line Primer** is applied between masking tape to prevent “bleed under” from occurring, then SportMaster White Line Paint completes the project with superior hiding and vibrant lines. SportMaster White Line Paint is available in textured and non-textured formulas.

### SPORTWAX™ CLEAR COAT (OPTIONAL)

A 100% acrylic top coat that dries clear and provides extra protection for the court surface. Creates a semigloss appearance and makes textured surfaces easier to clean.
