HOW IT WORKS

We provide a free comprehensive energy audit to identify areas where energy conservation is possible. We calculate potential savings associated with an upgrade in the identified areas. We then present a turnkey proposal to upgrade in the areas that have the best ROI's. We provide financing and guarantee that the savings created from implementing the project will more than pay for the financed payment.

Our projects typically pay for themselves in 5 years or less!

FINANCING

We provide the best financing options in the business. Our interest rates are as low as 5.1% and we can finance projects as small as \$5k or as big as \$5M. We even offer off-balance sheet financing, "rental agreement" options.

OUR TEAM

Our company was founded on principles of integrity and service. We truly do take pride in executing customer energy projects centered on your company's objectives and goals. We have the best auditors in the business to ensure accuracy and comprehensive projects. We have a large network of engineers who are experienced in energy conservation, and we have the best installers in the business.

WHO WE CAN HELP

We can provide our energy savings programs to almost everyone. From a residential home to a college or University, we have got you covered. We work with car dealerships, assisted living facilities, hospitals, schools, restaurants, and shopping centers.

ENERGY CONSERVATION MEASURES

- LED Lighting
- HVAC
- Solar
- Retro-commissioning
- Water
- Insulation
- Windows
- Surge Protection
- And so much more...

WHY SHOULD YOU DO A PROJECT?

- Cost of Utilities are rising
- Improved Aesthetics
- Improved Comfort
- Better learning/working environment-Best of all...you are already spending the money on your utilities, why not improve your faculties and save money!

"The proposal submitted by Energy X was by far the best in pricing and best in product. I could not have asked for a better experience."
