CONSTRUCTION PROFESSIONALS

## WE KNOW K-12 CONSTRUCTION...

Our local schools are one of our most important assets, serving students, teachers, staff and communities today and for years to come. Every K-12 construction project is unique and potentially complex. Requiring the coordination of architects, engineers, consultants and contractors, the ability to work with school boards and superintendents, and the need to stay on budget and on time. For your project to be a success, you need an experienced partner to get the job done.

MCP has decades of experience in K-12 school projects, including master planning, referendum assistance, new construction, renovations, and building additions. We understand the nuances of working with stakeholders and board members with diverse backgrounds and expectations, and often need guidance in navigating the intricacies of a

school construction project. At MCP, our construction management services are tailored to specific project or program needs, and our comprehensive project controls are integrated into the process to best manage the critical components of time, costs, scope, quality, and safety.

Our track record of working with local subcontractors demonstrates our commitment to supporting the communities and taxpayers of the school districts, regardless of our proximity to the project location.

You can be confident in us as your advocate to guide you through your K-12 education project, whether large or small. Our many repeat clients speak volumes about the success of our projects.
