

# Rackspace Elastic Engineering for Government

On-demand, dedicated expertise to help you innovate mission-critical solutions faster than the do-it-yourself approach.

Rackspace Elastic Engineering for Government helps government agencies and cloud-based technology providers that sell to the government accelerate innovation on the cloud, without sacrificing functionality or innovation speed. An assigned team of cloud and security experts works with your team to help you migrate and optimize your workloads, take advantage of cloud native capabilities and architect your zero trust security cloud environment.

IT organizations are increasingly expected to deliver more, faster and at lower cost. But a shortage of internal cloud expertise and complexity of security requirements are common challenges. That's where Rackspace Technology Elastic Engineering comes in to help, accelerating your cloud journey while working with your team at critical stages — when you need expertise the most.

- Use a flexible pool of expertise hours simultaneously across workloads.
- Streamline your cloud spend and achieve economies of scale.
- Access the same team of certified experts at each stage of your cloud journey.
- Migrate and optimize workloads faster one or many workloads at a time.

## Multicloud Expertise, Automation, Compliance and Security-as-a-Service

Gain on-demand access to a team of certified Government experts to help you navigate every step of your government cloud journey. Rackspace Technology helps to ensure that your cloud strategy supports the mission of government in a secure and authorized environment while enabling you to deploy innovative mission-critical SaaS solutions faster and at lower operational cost compared to the do-it-yourself approach. Rackspace Technology meets you where you are on your cloud journey with industry-recognized expertise to plan, design, manage and optimize your cloud infrastructure.

## On-Demand Elastic Engineering to Fast Track Your Cloud Journey

With Rackspace Elastic Engineering, your IT Team will free up resources to focus on your core mission and competencies.

- **Lower costs:** Use a flexible pool of hours for simultaneous use across one or many workload migrations and scale tier pricing up or down as your organization's needs change.
- **On-demand access to experts:** Engage an on-demand team of experts assigned to work with your team at any point on your cloud journey.
- **Diversified skill sets:** Leverage the right skill sets for each stage on your cloud journey. The experts assigned to work with your team include architects, engineers and technical account managers working together as one unit.
- **Consistent team structure:** The same team of cloud experts familiar with your goals and mission typically works with your team for extended periods of time.
- **Shared knowledge and resources:** Rackspace Technology creates and shares resources, platform tools and frameworks across all expert teams to deliver the best possible know-how to customers.
