Trash bags of waste recycled instead of landfilled

4,791

Acres of US forest in one year

DECARBONIZATION

PROJECT OVERVIEW

Veregy collaborated with Hamilton County in Indiana to design and install a Guaranteed Energy Savings Project. Veregy installed 3.1MW of solar across four different sites, as well as LED lighting in several of the municipal buildings, including the jail. Veregy is currently utilizing remote monitoring and demand management technology to ensure a productive and stable system, while performing routine maintenance to the solar arrays when necessary. With a combination of solar servicing and demand management, Veregy is helping Hamilton County stabilize one of the most variable items in its budgets - the cost of energy.

PROJECT HIGHLIGHTS

- Ground Mounted Solar Array
- Rooftop Mounted Solar Array
- LED Lighting
- Solar Maintenance
- Demand Management
- Remote Monitoring
