Who is Custom Controls Group, LLC?

Based out of Columbus, Ohio, Custom Controls Group, LLC (CCG) was formed in 2010 as a building automation systems integration company. Utilizing their more than 70 combined years of experience in all aspects of the construction industry, the two business owners are actively involved in the day-to-day operations of the company. That begins with project design, development, estimating, and installation, and continues through to close-out and customer retention.

CCG has a high-performance approach to projects, quality standards, and detailed follow-through. While originally founded with a focus on building automation systems, requests from their existing customer base drove CCG to extend their core values and expertise to include general contracting, HVAC/R, roofing, and energy efficiency services.

Gordian's solutions help organizations effectively plan, build and manage their infrastructure and facilities. Thousands of organizations have relied on that partnership to ensure they are providing safe and healthy physical assets for everyone in the community for over thirty years.
