

INTELLIGENT SOLUTIONS FOR SUSTAINABLE STRATEGIES & FACILITIES OPTIMIZATION

**WE CAN BUILD A MORE SUSTAINABLE FUTURE
AND CHALLENGE THE STATUS QUO THROUGH
INNOVATION AND COLLABORATION**

**Stark Tech Provides Integrated Turnkey Solutions
for the Optimization of Commercial and Industrial
Spaces, Landfill Operations & Utilities.**

COMMERCIAL AND INDUSTRIAL ENVIRONMENTS

Full-service provider of master systems integration, critical infrastructure, engineering support, clean-tech and mechanical systems, remote monitoring, and energy efficient solutions. Turnkey provider aligning technology and analytics to facilities management and service plans.

SUSTAINABLE ENVIRONMENTS

Single-source supplier of highly engineered battery energy storage systems and comprehensive renewable natural gas plants. Our engineering consulting team supports solar development projects and other clean-tech integrations.

CRITICAL ENVIRONMENTS

Industry leading cleanroom and critical environment turnkey design and implementation delivering on security, compliance and quality control requirements.

Our Customers Get Full Access to Experts in the Following Fields

- ▲ Data Science & Predictive Analytics
- ▲ Program & Project Management
- ▲ Master Systems Integration
- ▲ Design & Equipment
- ▲ Account Management
- ▲ Protective Systems
- ▲ Professional Audio / Visual
- ▲ Compression Equipment
- ▲ Renewable Energy Consulting
- ▲ Renewable Natural Gas
- ▲ Battery Energy Storage & Microgrids
- ▲ Well Building & LEED
- ▲ Mechanical & Electrical Engineering

WE'VE GOT FACILITIES MANAGEMENT DOWN TO A SCIENCE

Our integrated team approach allows us to offer our Commercial & Industrial and Critical Environment customers end-to-end solutions that provide visibility into operational efficiencies, control costs, and maximum energy savings.

TURNKEY PROJECT MANAGEMENT

- ▲ Energy Master Planning
- ▲ Design Build Implementation
- ▲ Finance & Procurement
- ▲ Energy Performance Contracting
- ▲ Solar & Renewable Integration Consulting

BUILDING INTELLIGENCE & INTEGRATION

- ▲ Controls and Automation
- ▲ Energy & Power Management
- ▲ Electrical System Monitoring
- ▲ Protective Systems
- ▲ Professional Audio/Visual
- ▲ Enterprise Building Management Software
- ▲ Utility Bill Management

FACILITIES EQUIPMENT

- ▲ Applied HVAC
- ▲ Critical HVAC/ Critical Power
- ▲ Boiler & Industrial Combustion
- ▲ Service & Maintenance Smart Energy & Microgrids
- ▲ Compression Equipment & Pumps

COMPREHENSIVE ENERGY SERVICE PROVIDERS

Our team of energy experts can provide you with best-in-class turnkey solutions that can put you on the path to carbon offsets and reaching net zero emissions, while cutting costs and maximizing energy optimization.

RENEWABLE NATURAL GAS

- ▲ Hydrogen Sulfide Removal
- ▲ Dehydration
- ▲ Compression
- ▲ Volatile Organic Compound Removal
- ▲ Dioxygen & Carbon Dioxide Removal
- ▲ Nitrogen Rejection

BATTERY ENERGY STORAGE

- ▲ Lithium Iron Phosphate Chemistry
- ▲ Peak-Loading & Demand Response
- ▲ Voltage Support
- ▲ Frequency Regulation
- ▲ Microgrid on a Skid™

RENEWABLE INTEGRATIONS

- ▲ Custom Solutions
- ▲ Energy Master Planning
- ▲ Control Systems
- ▲ Solar Development Consulting

OUR COMPREHENSIVE PLANS TO ACHIEVE ENERGY SUCCESS

We can design a roadmap and customize solutions that address your immediate needs with future-proofing technology that will support long-term goals and objectives.

MASTER SYSTEMS INTEGRATION

DIV 25 Low Voltage System Integration, Building Controls, Protective Systems & Life Safety, Audio / Visual Solutions

HVAC, BOILERS, & CRITICAL POWER

Conception thru Completion Design Support, Equipment Sales, Service Plans and Parts Solutions

MICROGRIDS & SOLAR

Renewable Energy Assessment, Planning, and Integration of Solar, Battery Energy Storage, and Microgrid Solutions

DATA CENTRALIZATION

The first step in our data centralization process is to bring visibility to your portfolio of buildings, no matter where they are located geographically.

DESIGN & DEPLOY

After opportunities are quantified, understood, and funded, the design and deploy phase serves to implement them in a holistic and transparent way.

DYNAMIC COMMISSIONING

Once engineered solutions are in place, our process works actively to ensure our solutions are in a persistently commissioned state.
