

YAMAHA 2025

KODIAK 450 EPS

Tactical Green

TOP FEATURES

Class-Leading Power Steering

Yamaha's Electric Power Steering (EPS) provides the industry's best balance of steering assist and positive feedback by adjusting to match terrain conditions in real time.

Ultramatic® & On-Command®

The Kodiak® 450 EPS brings Yamaha's renowned combination of the industry's most durable automatic transmission Ultramatic® with the rider-centric control and traction of On-Command® selectable 4WD. The result is outstanding capability with the confidence to get you through the most challenging terrain and back again.

Terrainability

With standard full-length skid plates, nearly 10 inches of ground clearance and independent double wishbone suspension with adjustable shocks, the Kodiak 450 EPS is ready to tackle rough terrain without breaking a sweat and with the sort of rider comfort that makes long rides a blast too.

Compact Chassis

Unlike many middleweight utility ATVs, the Kodiak 450 EPS isn't just a smaller engine under a full-size body. Yamaha built the Kodiak 450 EPS from the ground up to give riders a compact chassis for precise handling and maneuverability on the trail.

Roomy Ergonomics

To ensure that riders of all sizes can make the most of the Kodiak 450 EPS, the ergonomics were designed for maximum flexibility. Riders large and small have room to move around thanks to a long, comfortable seat and wide floorboards. The handlebar bend is shaped for riders of various heights to improve comfort for any rider.

Real-World Tough®

Like all Yamaha ATVs and Side-by-Sides, the Kodiak 450 EPS uses a range of features to improve durability and serviceability, from the toolless air filter design and oil drain ports to the high-mounted air intakes and marine-grade electrical connectors.

Ready to Tow & Haul

Rugged, large-diameter steel cargo racks with durable wrinkle paint finish can pack a total of 264 pounds combined. A heavy-duty 2-inch receiver comes standard and Kodiak 450 EPS can tow up to 1,322 pounds.

10-Year-Belt Warranty

The Kodiak 450 EPS transmission uses its own cooling intake to maintain proper temperatures, an oversized belt to handle the torque of the large motor and Yamaha's unique sprag clutch to maintain constant belt tension. The end result is a drivetrain built for years of trouble-free service that leaves the competition in the dust, and is backed by the industry's only 10-Year V-Belt Limited Warranty.
