Acer's Self-Maintainer and ASP Program

Empowering Precision and Efficiency in Hardware Maintenance

Acer's innovative Self-Maintainer and Authorized Service Provider (ASP) program is designed to empower businesses with the tools and authority to manage in-warranty repairs directly. This program allows authorized accounts to perform necessary repairs on Acer products they have purchased, ensuring that businesses can maintain continuity and efficiency in their operations.

Participants in this program are required to sign self-maintainer or ASP contracts, establishing a formal partnership that brings a host of benefits:

01

Direct Access to Parts: Accounts can order both in-warranty and out-of-warranty parts directly from the Acer ASP website or through Premier Support, facilitating quick and efficient handling of repairs.

Advanced Parts Provisioning: Qualified accounts benefit from receiving advance spare parts, enabling them to conduct same-day repairs and minimize downtime, a critical advantage for maintaining business operations.

02

03

Training and Support: Acer provides product-specific training, available online or in-person, to ensure that technicians are well-equipped and knowledgeable about the latest Acer technology and repair techniques. This training supports high-quality repairs that adhere to Acer's standards.

Financial Benefits: Qualifying ASP accounts are eligible to receive labor reimbursements for in-warranty hardware repairs, offering a financial incentive that helps offset the costs associated with maintaining a skilled service department.

04

05

Flexible Repair Options: Both self-maintainer and ASP accounts have the flexibility to send units to the Acer depot for repairs at any point. This option provides an alternative solution when in-house repairs are not feasible, ensuring that all equipment can be maintained to optimal standards regardless of the local capacity to perform repairs.

Acer E-learning Repair Program

Introducing the Acer Service e-Learning Repair Program, tailored for high school students in grades 9-12 interested in technology. This self-paced course covers basic hardware repair across five chapters, focusing on component handling, replacement, and Chromebook-specific configurations. Students progress by passing chapter quizzes and can earn the Acer Service CRT Certificate upon completion.
