

PIVOT[®]
PERFORMANCE TURF

PIVOT® PERFORMANCE TURF: ENGINEERED FOR THE GAME, MADE FOR THE WIN.

Designed without performance infill, Pivot Performance Turf eliminates the challenges of traditional systems while maintaining consistent quality for athletes and facilities alike. TenCate, the world's leading turf manufacturer, brings 300+ years of research and expertise that have resulted in the best turf fibers to work with.

So, what sets Pivot apart? Its innovative no-performance infill design. By removing the need for traditional infill, Pivot reduces fiber loss and eliminates recoil that can disrupt gameplay.

Pivot Performance Turf is purpose-built for athletic performance, delivering unmatched durability and consistency of play year after year.

Enhanced Durability: No abrasive infill means fibers stay intact, ensuring the field maintains its high-performance quality season after season.

Consistent Play: Without traditional infill shifting or compacting, Pivot provides a stable, predictable surface—ideal for fast sprints, sharp turns, and uniform ball roll.

Improved Comfort: Pivot minimizes strain and keeps game play smooth and natural, so athletes feel the difference.

THE SCIENCE OF BETTER PLAY.

Great sports surfaces don't just happen—they're built. At TenCate's Center for Turf Innovation (CTI), over years of dedicated development, countless combinations, and rigorous testing, we landed on a groundbreaking pairing of traditional, durable sports fibers with newer, thinner fibers that look and feel more like natural grass.

More than 50 iterations were rapidly prototyped in response to testing data to create Pivot Performance Turf. Our R&D team worked directly with college and professional athletes, using biosensors, high-speed video analysis, and player feedback to test, tweak, and perfect every detail.

BUILT TO PERFORM. DESIGNED TO LAST.

Pivot Performance Turf was intentionally engineered to prioritize performance, longevity, and sustainability. Here's how it changes the game:

- **Zero Performance Infill:** Consistent grip and give without the need for traditional black pellet infill.
- **200% More Fiber:** Packed with more fibers than competitive systems for enhanced playability.
- **Manufactured with No Added PFAS:** Since 2023, we've manufactured synthetic turf without added PFAS as part of our commitment to safe and healthy play.
- **12-Year Warranty:** With one of the longest warranties in the industry, your team can have peace of mind that your field will be gameday-ready for the long haul.
- **Recyclable* at End of Life:** Through TenCate's facilities and partnerships with advanced recyclers, Pivot can be turned into like-new plastic when it's time for replacement, contributing to a sustainable future.

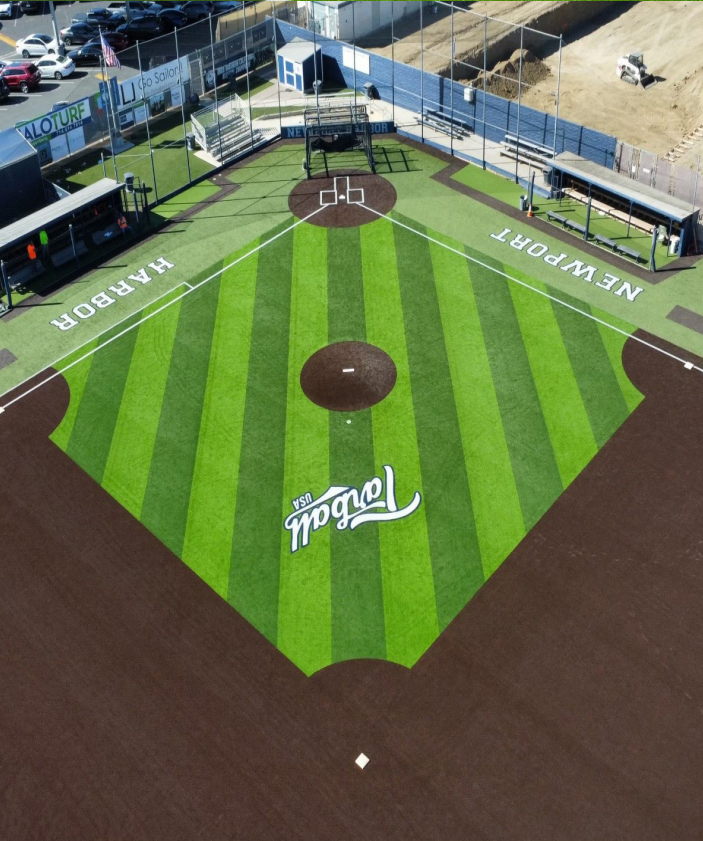

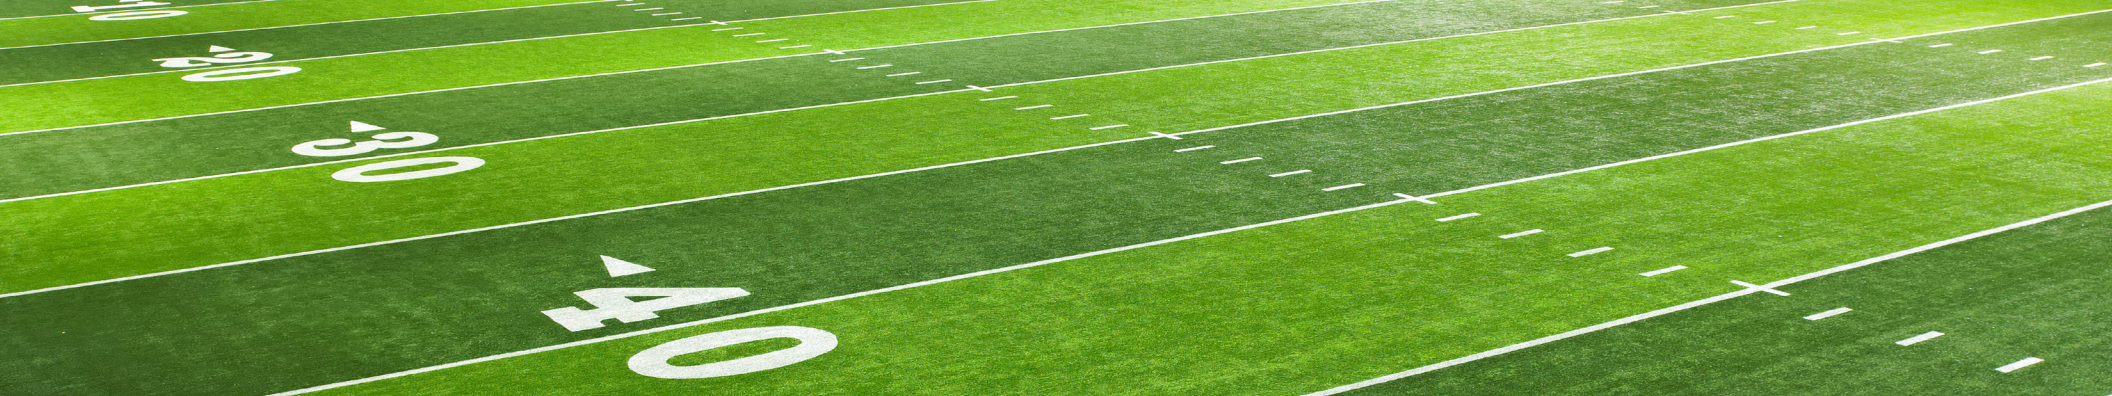

*Authorized recycling facilities are in several locations across the US, but may not be in your local area. Please check with your TenCate representative to learn more.

IT'S TIME TO PIVOT.

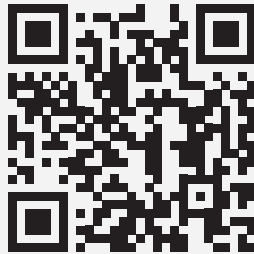

Pivot is more than just a playing surface—it's a solution to the challenges of traditional synthetic turf systems. Pivot can be recycled through our dedicated advanced recycling program, offering a responsible end-of-life option.

Built for long-lasting quality and consistent play, Pivot brings value to schools, sports teams, and facilities alike. Whatever the sport – from football to baseball—Pivot supports athletes in achieving their best while facilities benefit from its durability, low-maintenance design, and 12-year lifespan. When you choose Pivot, you choose a field that works as hard as your team.

TRANSFORM YOUR FIELD, EMPOWER YOUR PLAYERS.
