

Marriott

Bethesda, MD

Marriott International sought to relocate its headquarters to the bustling downtown of Bethesda, MD, with a goal of creating a flexible, dynamic environment for its associates. To achieve this, Marriott enlisted a team of experts including Gensler, rand*, Price Modern, and Haworth to design, construct, and furnish the new global headquarters.

Designed for LEED Gold certification and a recipient of a 3-star Fitwel® certification, the headquarters promotes a healthy and welcoming environment for associates and visitors. Our team specified, procured, and installed solutions for workstations, private offices, conference rooms, wellness spaces, cafés, and more.

Haworth collaborated weekly with Marriott’s design team to ensure all functional and aesthetic needs were met across 2,800+ workstations and private offices. Construction and furniture installation followed a phased schedule requiring tight coordination, and open communication between all vendors ensured a smooth and successful outcome.
