

5 Simple Steps to Smarter Construction Procurement

Step 1

Joint Scope Meeting

Gordian schedules a meeting at the site for those involved to discuss project and design details.

Step 2

Detailed Scope of Work

Gordian helps prepare a Detailed Scope of Work that describes the work the contractor will perform.

Step 3

Price Proposal

The contractor prepares a Price Proposal by selecting the appropriate tasks from Gordian's Construction Task Catalog® (CTC).

Step 4

Price Proposal Review

Gordian reviews the Price Proposal to ensure the contractor has selected the appropriate tasks and quantities.

Step 5

Job Order Issued

Once the Price Proposal is approved, you issue a Job Order for the contractor to proceed.
