

Safety Program

Karber Corporation is a trusted contractor with expertise in heating, ventilation, air conditioning, refrigeration, process piping, plumbing, building control systems, as well as service, retrofit, and maintenance solutions.

We operate as a fully integrated company with in-house fabrication, installation, commissioning, and service capabilities. This structure allows us to deliver practical, cost-effective solutions for every client's mechanical and control system requirements.

Karber Corporation has developed a comprehensive Safety Program to ensure compliance with all applicable regulations while promoting the highest standards of safe practices. The program is designed to protect the health and well-being of every employee and trade partner.

We are committed to supporting employees who are injured on the job by providing access to quality medical care, meaningful temporary alternative work opportunities, and resources to help them rehabilitate and return to full strength.

Safety Training

K Corporation provides robust safety training to ensure our team and those around them remain protected:

- Employee Safety Orientation
- Confined Space Entry
- Asbestos Awareness
- Respirator Training & Fit Testing
- Fall Protection / Awareness
- Forklift Certifications
- Scaffold Awareness
- CPR / First Aid
- Trench / Excavation Awareness
- Hazard Communication (MSDS)
- Supervisor Safety Training

In addition to safety training, Karber Corporation conducts:

- Weekly Safety Meetings with all employees to reinforce awareness and safe practices.
- Monthly Technician Safety Meetings to review and update safety training.

Safety Is Our Culture. Work Safe Today, Go Home to Family Tonight.
