Solutions that Make a Difference

Changing lives, reuniting families, and making communities safer through advanced technology and world-class service.

SCRAM® SYSTEMS

Integrated Alcohol and Location Monitoring for High- and Low-Risk Clients

Alcohol Monitoring Solutions

SCRAM Continuous Alcohol Monitoring® (SCRAM CAM®) is proven to support long-term behavior change and is designed to help high-risk clients remain sober and compliant.

- Automatic sampling every 30 minutes, 24/7 helps prevent drinking around testing schedules
- Scientifically proven test results are court-validated and single-source admissible—no additional testing needed

SCRAM Remote Breath® Pro is a versatile, compact, and durable breath alcohol testing device for low-risk clients or those that have earned less intensive monitoring.

- GPS location with taken and missed tests and configurable scheduled, random, and on-demand testing
- Equipped with enhanced facial guidance to help reduce errors and manual photo matching

The **LifeSafer® Ignition Interlock Device** (IID) provides accurate and reliable monitoring support which helps clients remain compliant, reduces illegal vehicle starts, and allows for secure and timely reporting.

- Smallest and easy-to-use device with no difficult blow patterns
- No-call install allows clients to enroll in less than 5 minutes—and same day install is guaranteed

Location Monitoring Solutions

SCRAM GPS® 9 Plus provides superior location accuracy to help officers more effectively supervise clients while enhancing community safety.

- Industry-leading strap design and tamper technology reduces false alerts and delivers instant notifications
- SCRAM GPS Analytics™ quickly puts client movements into context with easy-to-view information, helping officers make sense of client movement

Optimized to work with today's homes, **SCRAM House Arrest®** offers effective curfew supervision while enabling clients to remain accountable.

- Optimized for multiple connectivity options to work in any home or work setting
- Waterproof design with multiple anti-tamper systems, including cut-strap detection

The industry's most advanced and comprehensive suite of electronic monitoring technologies, client management solutions, and support services. Designed to empower programs and clients to achieve better outcomes.
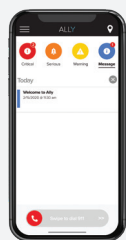

Integrated Software and Client Engagement Solutions

SCRAM Systems' integrated client management software provides the tools officers need to increase productivity and simplify their workload across all monitoring technologies.
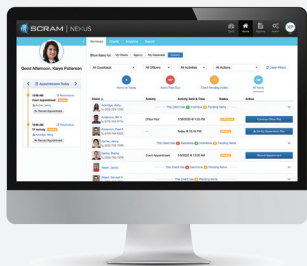

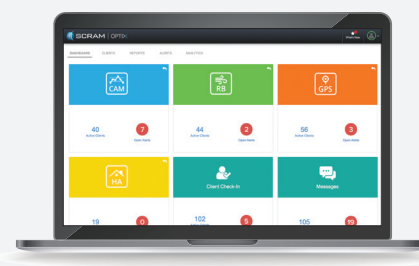

SCRAM Nexus® Case client-focused decision support case management software empowers officers to consistently implement departmental policies and evidence based practices by automating daily tasks, workflows, and interventions. This allows officers to more effectively use their resources to achieve true behavior change and enhance client success.

- Integrates with internal and outside providers and automatically refers clients to services such as treatment, drug testing, and electronic monitoring
- Provides interactive reporting for unprecedented insight into client compliance, policy adoption, supervision model success, and agency performance

SCRAM Optix™ integrated software and dynamic reporting and analytics deliver an in-depth, interactive analysis of program health.

- Helps officers manage entire SCRAM electronic monitoring caseloads with a single login
- Allows officers to view, access, and work alerts by type, priority, caseload, or services
- Integrated reports graphically illustrate key program metrics in an easily shared format

The **SCRAM Ally® Victim Notification** mobile app may provide peace of mind for victims while working in conjunction with SCRAM GPS to ensure that when a GPS client is in proximity to the victim's phone, both the victim and the supervising authorities are immediately notified.

- Configurable victim mobile zone radius
- Mapping software allows officers to compare client and victim locations

The **SCRAM TouchPoint®** mobile app is a smartphone-based supervision and engagement tool that enhances communication between officers and clients.

- Secure messaging, mobile check-ins, and EM reminders save officers time and resources to help improve client compliance and outcomes
- Provides a GPS point with every check-in, giving officers additional insight into a client's response
- Two-layer bio-verification verifies client identity at check-in, helping ensure client compliance

Program Support Services

SCRAM Systems offers a comprehensive collection of services to courts and agencies to help them efficiently and effectively manage client compliance and increase program effectiveness, all while supporting community safety.

Supporting programs, not just technologies.

Customer Service

Our team of certified analysts can answer questions about client activities, alerts, notifications, and equipment.

Available 24/7/365 via toll-free phone, email, or online chat.

24/7 Monitoring Center

Round-the-clock program and customer support tailored to every program's unique needs.

Analysts can provide expert recommendations to continually optimize a program's efficiency.

Comprehensive Court Support

Specialized training ensures staff has the information they need to testify for evidentiary hearings.

Support staff can provide written reports confirming violations and in-person expert court testimony.

Field Support Services

Highly-trained product and industry experts available in-person, by phone, or by video.

Full service and support including onsite training, equipment installations, repair and maintenance, and more.

Dynamic Training Programs

A variety of courses to help educate and certify staff on SCRAM Systems hardware and software.

Available in-person or online via our robust training platform, SCRAM Systems University.

Inventory Management

Save time managing inventory with built-in software tools.

Check the status of an individual device, verify shelf stock at all program locations, and review entire inventory.
