

Sustainability at every step. From products to process.

In 2025, CCL Industries—parent company of Avery—earned a **Silver Medal rating from EcoVadis**, placing in the top 15% of companies that are assessed across EcoVadis' database 12 months leading up to the award. Avery takes sustainability seriously and, together with our parent company, we are committed to ensuring transparency across the value chain.

EcoVadis is a globally recognized leader in business sustainability ratings.

98%*

of our paper-based labels are made with materials certified to sustainable sourcing standards (FSC®, SFI®, PEFC®).

86%*

of our paper labels feature a recycle-friendly adhesive.

95%*

of our non-label paper based products (dividers, cards, and tags) use sustainably sourced paper.

*Recyclability and sustainably sourced claims are based on our company's internal assessments and methodologies, have not been independently verified or third-party certified, and may vary depending on local recycling capabilities, sourcing practices, and product type. Information current as of August 2025.

- Avery's retail products are printed using water-based, UV, or UV-LED inks—never solvent-based inks
- Select labels are made with **100%** recycled paper, including matte white and kraft
- Our EcoFriendly line includes dividers and badges made from **100%** recycled paper
- All binder boards are constructed using **100%** recycled paper

Packaging

98%*

of our corrugate shipping boxes are made with at least 70% recycled content.

79%*

of our paperboard packaging is made with at least 85% recycled content.

Manufacturing

In partnership with our parent company, CCL Industries, Avery is committed to tracking and reducing our greenhouse gas emissions. Each year, we measure emissions across manufacturing, materials, energy use, and other business activities to help drive meaningful change across our organization.

CCL Industries has set science-based targets aligned with industry and climate standards—and Avery is doing our part to help reach those goals.

- **Near-Term:** CCL Industries Inc. commits to reduce absolute Scope 1 and 2 GHG emissions by **50%** by 2030 from a 2022 base year.
- **Long-Term:** CCL Industries Inc. commits to reduce absolute scope 1, 2, and 3 GHG emissions** by **90%** by 2050 from a 2022 base year.

CCL Industries waste reduction goals

*Recyclability and sustainably sourced claims are based on our company's internal assessments and methodologies, have not been independently verified or third-party certified, and may vary depending on local recycling capabilities, sourcing practices, and product type. Information current as of August 2025.

** Scope 3 GHG emissions from purchased goods and services, capital goods, fuel and energy-related activities, upstream transportation and distribution, waste generated in operations, downstream transportation and distribution, processing of sold products, use of sold products, and end-of-life treatment of sold products.
