# G gaggle

A Complete Safety and Well-Being Solution for
Leaders Who Put Students First

Gaggle is the choice for district leaders who prioritize safety. Since 1999, we've helped K-12 schools protect student lives and lifetimes through a combination of innovative technology and proactive human support. Our solutions give educators the tools they need to identify students in crisis, intervene before harm occurs, and create a culture of care.

By combining prevention, professional care, and in-the-moment support, Gaggle creates a holistic safety net.

SAFETY MANAGEMENT

The foundation of our solution, Gaggle Safety Management uses advanced machine learning and trained safety experts to analyze student-created content in school-issued accounts and devices. When signs of self-harm, violence, or other concerning behavior are detected, our team escalates the issue to the district.

- ✓ Gun Detection Mode
- ✓ Mailflow Intercept
- ✓ Email Quarantine
- ✓ Web Activity Monitoring

Gaggle empowers districts to provide proactive, timely, and comprehensive support that addresses students' immediate safety, mental health, and emotional needs. We partner with over 1,500 school districts to protect more than 6 million students.

Therapy

Gaggle Therapy connects students with licensed mental health professionals for weekly teletherapy sessions. This flexible and accessible service helps students manage underlying challenges, build resilience, and create pathways to long-term well-being.

ReachOut
Student Crisis Line

Available 24/7, ReachOut gives students direct access to trained crisis counselors any time they need support. Our team responds in real time and escalates serious concerns to school leaders, ensuring no student feels alone.

Web Filter

More than just a filter, Gaggle Web Filter offers dynamic, real-time protection. It not only blocks inappropriate content, it categorizes automatically as it scans new sites. Designed for ease of use and the ever-changing internet, it is easy to implement.

Archive

Gaggle Archive helps districts meet compliance requirements by securely storing files and communications in one searchable, cloud-based system. With powerful search tools and built-in retention policies, it provides necessary back up and makes FOIA requests and litigation holds simple to manage.
