The JH Williams product line includes a wide variety of tools, with an offering of over 8,000 SKUs. Key product categories include torque tools, sockets and drive tools, wrenches, tool storage, pliers and screwdrivers, industrial hydraulics and safety and specialized tools.

Established in 1914, Sioux Tools has set the standard in USA-made industrial air and pneumatic power tools. Their lineup features grinders, drills, screwdrivers, sanders, and impact wrenches, all engineered for use in manufacturing, assembly, aerospace, transportation, shipbuilding, mining, and maintenance sectors. Backed by over 100 patents and featuring ergonomic design, Sioux tools deliver long life, high torque, and easy serviceability.

Our comprehensive line of automotive lifts represents decades of commitment to finding inspired lifting solutions. We aim to increase shop efficiency, maintain safety and enhance revenue potential. Our lifts range in capacity from 6,000 lbs. to 152,000 lbs., covering a variety of standard automobiles and fleet maintenance needs.

Snap-on ShopKey is a comprehensive automotive repair information system for professional technicians that integrates OEM data, real-world experience-based "Real Fixes", and shop management tools. It is available via an online subscription and is designed to streamline the repair and diagnostic process, enhancing productivity.

NEXIQ Technologies is a leading developer of diagnostic tools and information technology solutions for the heavy-duty vehicle industry. It provides hardware and software used by fleet operators, OEMs, and service centers for commercial truck maintenance.

Pro-Cut Brake Solutions is a leading manufacturer of patented on-car brake lathes and related accessories used in automotive repair. Their products are designed to resurface brake rotors while they are still attached to the vehicle's hub, a process called rotor matching. The Pro-Cut Super Bench combination lathe is a versatile option that allows shops to resurface both brake discs and drums. It is designed for use off the vehicle.

The John Bean brand is a leader in automotive undercar service equipment for garages, tire shops, and body repair services and provides a range of innovative undercar service equipment. Wheel aligners, wheel balancers, tire changers, auto lifts and ADAS calibration systems.

Our industrial vending machines provide point-of-use inventory management for industrial supplies. Workers login or simply scan an ID card to issue or return items. The industrial vending system does the recordkeeping automatically just like a tool crib attendant, it can even re-order the products for you.

Power Hawk Technologies is dedicated to delivering innovative, high-quality engineered products and accessories, backed by exceptional customer support. We proudly serve a diverse range of industries and applications, including fire/rescue and emergency services, military, law enforcement, bomb squad and EOD, industrial, nuclear, and more. Our unique solutions are designed to meet the critical demands of professionals who rely on performance, reliability, and excellence.

The CDI brand is a respected leader in the development of precision electronic and mechanical torque instruments and force/tension calibration systems. Whether it's torque wrenches or drivers or torque testing and calibration equipment, they are all made according to the most exacting standards. CDI is ISO 9001 certified and the top supplier of torque products in the industry.

Airframe and industrial hand tools. With over seven decades of expertise in tooling, ATI offers an extensive array of tools for Drilling, Countersinking, Riveting, and Bucking procedures.

Bahco is a Swedish brand within the hand tool industry. Its roots go back to the industrial revolution in Sweden in the late eighteen hundreds, starting with innovations such as the pipe wrench and the modern adjustable wrench. Since then, the product range has expanded with a total assortment of products that include over 14,000 hand tools.
