## 5-Point Approach

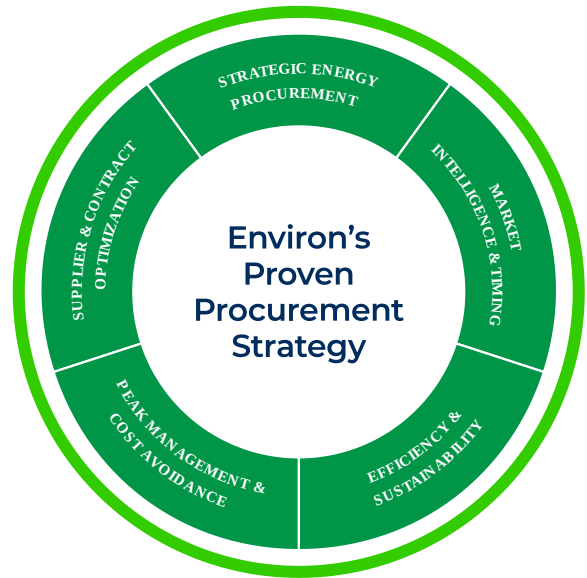

**Strategic Energy Procurement** Tailored strategies align energy purchasing with financial and operational goals.

**Market Intelligence & Timing** Layered hedging and data-driven analysis, pinpoint the best purchasing opportunities to buy at market lows and avoid volatility.

**Supplier & Contract Optimization** Vetted, credit-worthy, suppliers ensure long-term cost efficiency and reliability.

**Peak Management & Cost Avoidance** Reduce capacity charges through proactive demand response planning.

**Efficiency & Sustainability** Cost-saving efficiency programs and renewable energy solutions deliver integrated strategies.

## Get More Than The Lowest Price

Unlike traditional energy brokers who focus solely on securing the lowest price, we partner with thousands of clients to build long-term energy strategies that deliver lasting value.

- Clients save 10%-20% or more on electricity and natural gas supply costs.
- Deep supplier relationships ensure the best contract terms.
- Rely on our 30 years experience serving clients across all industries.
- We're endorsed by 100+ trade associations and chambers of commerce.

### Why Environ

With our suite of integrated services, you get an energy management strategy that combines procurement, engineering, and sustainability advisory to reduce carbon, energy, and costs while increasing efficiencies at your facilities. This connected approach drives positive results other firms can't help you achieve.
