

SMARt Locker
solutions for
flexible
workspaces

They build
lockers

We design
solutions

TZ develops end-to-end integrated locker solutions that help companies manage secure access, optimise workflows and productivity, and capture and use transactional data. We help our clients transition their workplace to a truly smart environment.

TZ is a leader in the design of intelligent locker solutions for agile workplaces. We offer solutions that support and enable the corporate workplace from employee storage, package delivery and management to asset management and tracking.

TZ's workflow-driven solutions are focused on delivering functionality, serviceability and utility

Why businesses prefer TZ

System flexibility

Scalable and modular locker solutions – customers can choose the locker design that suits their needs and budget

Granular transactional reporting

Wide range of reporting available that can be filtered, generated and exported to PDF or Excel

Centralised locker management

Admins can manage all lockers and define locker settings from a centralised web-portal

Compatibility with 3rd party hardware

Works with a wide range of reader hardware and third-party devices

A single system with endless functionality

TZ's SMARt Locker solutions are designed on an open and extensible software technology platform to allow flexibility in customisation and upgradeability to suit the requirements of today and those of tomorrow.

- > Web portal for centralised monitoring and management of networked locker banks
- > Out-of-the-box granular real-time or historic transactional reporting
- > Application of business rules for dynamic locker management, optimised usage and efficient administration
- > Extensive library of APIs to support integration with corporate management systems for automated data syncing
- > Range of secure access control and authentication methods including Active Directory and Azure Active Directory, Secure PIN entry, employee access cards and smartphone app interaction
- > Works with a wide range of reader hardware and mobile access credentials (HID Seos, Siemens, Schneider, etc)
- > Local database at the locker bank to ensure continued operation in the event of network outage
- > Ability to send notification emails or SMS messages

Locker Bank Layout - Demo: Virtual Kiosk

Locker	Locker Code	Available	Occupied	Failed	Expired	Returned	Reserved	Other
Core		81	2	0	0	0	0	4
Edits		30	1	0	0	0	0	0
Small		15	2	0	0	0	0	0
Medium		10	0	0	0	0	0	0
Total		136	5	0	0	0	0	4

Flexible workplaces need flexible solutions

Agile organisations need solutions that can facilitate and support their objectives to drive workplace productivity, employee satisfaction and to maximise real estate efficiency. Without the appropriate enabling technologies, the plans for workplace transformation are never fully realised.

What makes TZ SMART Lockers so different?

Technology partner, not locker manufacturer

With a dedicated in-house, full-service product development capability that provides cross discipline product design, engineering, production sourcing, software development and integration, TZ is adept at delivering turn-key hardware and software driven systems that are customer centric and customised to suit local requirements, functional work practices and regulatory compliance.

A focus on software implementation

TZ's software infrastructure represents a fully integrated and flexible platform that starts at the localised client application at the locker bank for workflow implementation, synchronises with an enterprise level centralised server for remote system reporting, live locker unit monitoring and integration with third party systems. With sophisticated features such as remote locker bank control and management, real-time granular transactional reporting, locker reservation, smartphone app operation, and integration with third party back-end systems for streamlined operation.

What makes TZ SMART Lockers so different?

Modular design for maximum flexibility

TZ's design-oriented solutions are focused on delivering functionality, serviceability and utility. We start with a modular framework to ensure ease of installation and maintenance, then incorporate high utility options in line with customer needs – flexible locker bank configurations; extensive range of aesthetic finishes; metal or laminate locker construction; or additional enhancements such as LED status indication, Braille keypad and emergency key locker over-ride.

State-of-the-art hardware

Incorporating TZ's patented SMART Locking Device technology, our solutions have unique granular intelligence at the locker level for unprecedented sensing and switching capability. TZ's IP addressable SMART Devices support plug and play system enhancements, making technology upgrades and locker bank reconfiguration simple.

Robust supply and support network

TZ's locker suppliers are well respected local and Asian based manufacturers providing TZ with enormous flexibility when it comes to design customisation, finish options and the capability of meeting aggressive supply lead-times. Coupled with a network of accredited installation and maintenance contractors, TZ's business is committed to meeting high service level undertakings for system support and maintenance for our customers.

Solutions that enable the workplace

Package Management

Deliver a comprehensive package management solution that gives facility and mailroom managers total control and improved operational efficiency over corporate package and mail logistics

Employee Day Storage

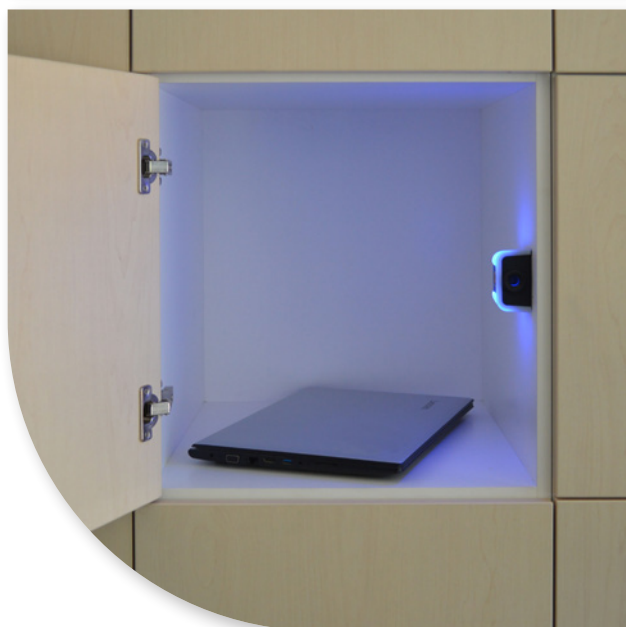

Enable workplace mobility and flexibility. Benefit from a robust enterprise level storage solution aligned to meet the dynamic and security needs of the modern workplace

IT Asset Management

Distribute IT assets to anyone, anytime, day or night. Experience unparalleled security with real-time monitoring and reporting for complete traceability and accountability

End of Trip Amenities

Deploy fully integrated end-of-trip solutions that support usage options, flexible locker reservations and optimised system management

The preferred provider for leading corporations around the world

Organisations need technology driven solutions that can adapt to the rapidly changing needs of the workplace environment.

With solutions developed in collaboration with world leading corporations, TZ is the preferred provider for major blue-chip corporations around the world.

Think SMART. Think TZ.
